Hints on the Cultivation of Spring Flowering Bulbs . .

The Soil and its Preparation.

Any good well-worked soil will grow Bulbs, provided it is well drained and broken up. Sandy loam suits them well, and even white sand, if well enriched, will grow them, but strong, stiff soils must be thoroughly broken up, drained if necessary, and lightened by the addition of sand or vegetable matter before they are suitable. A green crop grown on the land after its preparation, and dug in, would greatly help it into a proper condition for Bulbs. When land has been deeply dug for the reception of Bulbs, it should be allowed to remain unplanted for a week or two to allow it to settle, otherwise the Bulbs may get too deep down in the soil.

How to Plant Bulbs.

Bulbs may be planted in groups, beds, or rows, and the distance apart must be determined by the size of the plants when grown. The soil must never be very wet or sticky when planting is done, and unless it has settled after digging the soil should be firmed with pressure of the foot, so as to give the Bulbs a firm base. If the soil is inclined to be stiff a little sand under the Bulbs greatly helps drainage and prevents rotting. For special directions for the cultivation of Hyacinths in water see page 4.

THE PLANTING.—The size of the Bulb must be taken into consideration when planting, and if a covering of soil equal to the diameter measure of the Bulb is given, it will generally be sufficient. A Hyacinth Bulb, measuring 2 inches in diameter, requires a covering of 2 inches only, but for late plantings of Gladioli we recommend that the depth should be increased, so that the Bulbs may escape the surface heat of summer.

Manuring and Mulching.

Nearly all Flowering Bulbs dislike ammonia, and fresh stable manure or fowlyard manure must never be used. Well rotted stable manure or cow dung, which has been maturing, can be safely used, but it should be well dug in, and not allowed to come in touch with the Bulbs. In the case of Daffodils, the manure is intended to hold the moisture like a sponge, and is not applied as a fertilizer. A dressing of bone dust may also be given with advantage when planting any of the Bulbs. It should be well mixed with the soil.

A top dressing of old stable manure or decayed vegetable matter placed over the surface of the soil, to a depth of about two inches is invaluable for Gladioli or Lilliums, etc., during the summer months, as it keeps the roots cool and retains the moisture in the soil. It is not necessary, however, for Spring flowering Bulbs; for these the soil should be kept open with a hoe or cultivator.

The Best Months to Plant.

All the Bulbs we list can be safely planted during March, April and May, with the following exceptions:—Lilliums should be planted during May, June, and July; Gladioli from April until October, and later if Bulbs are obtainable; and Montbretias, Tigridias, and Vallota Purpurea during June and July.

—ANDERSON & CO.

OUR ILLUSTRATED CATALOGUE of SEEDS & PLANTS
Will be posted early in March.

ANDERSON & CO.'S CHOICE FLOWERING BULBS

The lovely Anemone

SINGLE ANEMONE.

A. Formosissima (SPREKELIA). The Jacobean Lily. Showy bulbous plants, with beautiful brilliant crimson flowers; a handsome border plant ..

1s each

Babiana TALL BLUE, and Shades. DWARF—Beautiful Blue and shades of same.

FINEST MIXED, including some beautiful Red shades.

Very showy plants, producing rich self-colours and very distinct hues in the same flower, with long wire-like foliage. To succeed, they should be planted in a light sandy compost—beautifully sweet-scented.

Brunsvigia Multiflora .. 1s each

This magnificent border plant forms a handsome crown of flowers on a stem of about three feet, containing from 18 to 24 separate blooms; the colours are pink and white, with a delightful perfume; will flower first season.

Crocus Best suited to the cool districts.

Blue, 2s 6d doz. Yellow, 2s doz. White, 2s doz. Striped, 2s 6d doz. Mixed Colours, 2s 6d doz.

Old English favourite, but only suitable to the colder districts. If the situation and climate are suitable, no special care is necessary; will thrive in poorest soils.

Freesia A great favourite.

These flowers have a delicious perfume, and are of great value for cutting; each bulb bears more than one stem with eight or ten flowers. Most desirable pot plants, but they are perfectly hardy out of doors; should be planted four inches apart, and lightly covered; from five to eight inches high.

Refracta Alba. White; sweet-scented; very fine .. 6d doz.; 3s 100

Leichtlini. White, passing to primrose; yellow throat, pretty .. 9d doz.; 5s 100

Pink (Quite New). A beautiful shade of pale pink .. 6d ea.; 5s 6d doz.

Anemones are deserving of a place in every garden, and we cannot too highly recommend them. Their matchless variety of colour, and endless shades of crimson, scarlet, lilac, rose, blue, purple, and white, together with the wonderful markings and blotches of colour, renders them very attractive. They are most beautiful as cut flowers, and will last for a week in water. The plants bloom for a long time, and by successional planting they can be had in bloom for three months. They prefer a fairly strong soil, well drained; the bulbs should be planted about six inches apart and covered about an inch.

Dutch Single. Mixed. All colours; a splendid assortment; very effective .. 1s doz.; 5s 100

Dutch Double. Mixed. Including many brilliant shades of colour .. 1s doz.; 5s 100

Dutch Single Scarlet. Very showy .. 1s doz.

Dutch Double Scarlet. Brilliant and very double .. 1s doz.

Blue Single .. 1s doz.

The Bride. Single variety. Beautiful pure white; flowers very freely .. 1s doz.

Chrysanthemum-Flowered. Mixed. A very distinct class, with large, handsome, double flowers; the petals are regularly incurved .. 1s 6d doz.

St. Brigid. A beautiful strain of the Chrysanthemum-flowered Anemones, double and semi-double flowers; most brilliant colours .. 2s doz.; 14s 100

Fulgens (SCARLET WINDFLOWER). Dazzling scarlet; light elegant growth .. 2s 6d doz.

Fulgens fl. pl. Double variety of the handsome Scarlet Windflower .. 2s 6d doz.

Double Named and Distinct Varieties .. 2s doz.

Amaryllis

New Hybrid, very large flower, rich crimson colour, with pale lemon stripe through centre of each petal .. 1s 6d ea.; 15s doz.

A. Vittata (HIPPEASTRUM). Hybrids. These produce flower stems from 18 inches to two feet, surmounted by remarkably handsome large heads of trumpet-shaped flowers; fine border plants of easy culture .. 1s each

A. Kermesimum. Terra-cotta .. 1s each

A. Belladonna. This splendid species is very variable in size and colour, producing variously shaded flowers from almost white to the deepest pink; they thrive best in light soil .. 6d each

FREESIA REFRACTA ALBA.

OUR ILLUSTRATED SEED AND PLANT CATALOGUE WILL BE POSTED IN MARCH.

HYBRID GLADIOLI.

The Gladiolus is a charming flowering plant, which can be had in bloom for six months in the year, if frequent plantings are made, as the bulbs can be kept in a dry state for a long period, and can safely be kept out of the ground if necessary until they have a shoot of an inch in length. As cut flowers they are unrivalled, and last a long time in water, and if cut when only the first flowers are expanded, the remaining flowers will open in water. The first planting should be made in April, followed by others right on until October, or later if bulbs are available.

We hold the Premier Collections in Australia of these lovely plants, and are constantly improving it by importing many of the charming new varieties which are raised on the Continent from time to time.

CULTURE OF GLADIOLI.

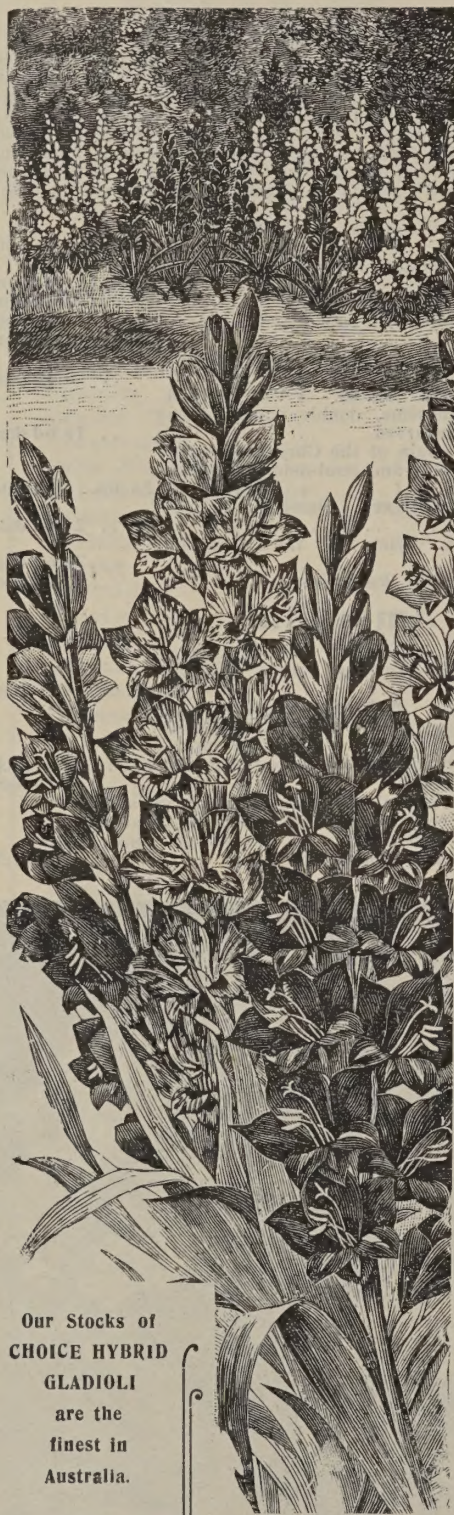

The culture of Gladioli is exceedingly simple, as they will grow in any average soil; but to grow them to perfection the soil should be of a sandy or loamy nature, and should be well worked or trenched to a depth of 18 inches. No new or green manure should be used in preparing the soil, but old well-rotted stable manure, dug well in so that it does not touch any of the bulbs, will greatly assist in keeping the ground in a moist, open condition, and will promote a strong, hardy growth. A dressing of bone manure can, however, be incorporated with the soil with perfect safety. If planted in rows, the bulbs should be 8 to 10 inches apart, and the rows 2 feet, and covered to a depth of 2 to 3 inches. When the shoots are about 12 inches high they should be tied up to keep them straight. The soil between the bulbs should be stirred up and kept clean. It will not be necessary to water them unless the season is a very dry one, if the ground has been well worked as we recommend, but if watering is resorted to let it be done thoroughly if less frequently. A top-dressing of manure over the surface of the soil is an excellent practice in summer. After the plants have finished blooming and show signs of ripening, by their yellow and brown leaves, the bulbs should be lifted and the shoots cut off close to the bulbs; and when the bulbs are properly dried the old sole or bulb should be removed and the new bulbs stored in a dry place until ready for replanting.

Gladioli Gandavensis 1s each; 10s per doz.

- Angelique.** White tinted flesh, blotch ivory white.
Amalthee. Pure white, violet red blotch, tinted lilac.
Amerique. Cinnabar red, striped red brown.
Amitie. Fleishy rose, shaded straw colour, streaked purple.
***Amilcar.** Soft flesh colour, glazed golden yellow, striped rose.
Andre Leroy. Very fine deep cherry red, flamed and striped with a rich darker shade; white blotch and stripe in centre of petal.
Aurore de Feu. Handsome spike, flowers bright rose colour, passing to scarlet, golden centre.
Assuerus. Tall spike, ashy rose colour, with white blotch.
***Beaute de Juillet.** Satiny rose, salmon tint, striped violet, long spikes.
Baroness Burdett-Coutts. Delicate lilac, tinged rose; long spike.
Beatrix. Pure white ground, delicately flushed carmine lilac.
Berryer. Cherry red edged lilac, white blotch.
Carmelite. Salmon rose, shaded with slate.
Carmen. Straw colour, streaked rose, citron rose at base of petals.
Chloe. Bright cherry red; large white blotch.
***Corsaire.** Dark scarlet, tinted brown.
***Commandant Marchand.** Compact spike, velvety dark ruby.
***Cronstadt.** White flowers, slightly flushed lilac.
***Carnation.** Fleishy white, tinged carmine, blotched purplish carmine.
***Daphnis.** Rosy salmon, flamed slate, white blotch.
Demosthene. Bright rose, streaked pure white, blotched violet carmine.
***Deuil de Saint Pierre.** Ashy rose, striped violet, red blotch.
Eugene Souchet. Bright rose, with white blotch.
Eugene Scribe. Tender rose, blazed carmine red.
Fantome. Large pure white flowers, slightly streaked rosy lilac.
Fille de France. White, suffused rose, throat amaranth.
Fra Diavola. Large bright orange rose, large pale yellow patch; fine flower.
***Formosa.** Perfect spike, satiny rose, striped carmine, creamy white blotch.
Gazelle. Fresh rosy lilac, slightly flamed, deep red, good.
Grand Vainqueur. Tall spike, rose colour, flushed carmine.
Hesperide. White ground, blotched and flaked bright rosy salmon, grand spike.
Hercules. Velvety scarlet, streaked orange red, violet blotch.
Hebe. Delicate rose, striped, edged and flaked carmine.
Helle. Lovely delicate mother-of-pearl rose, slightly glazed lilac.
Klondyke. Fine lemon colour, edges flamed blood red.
La Parisienne. White ground, passing to yellow; flaked mauve.
Lily. Large flowers, mottled with creamy white and bright soft rose.
Lampadaire. Cherry red, suffused slaty brown, blotch white.
La Perle. Splendid spike, large flowers, pure lilac, blotched violet carmine on lower petals.
***L'Unique Violet.** Dark lilac, tinted violet, flamed carmine.
Leviathan. Tall flower, enormous spike, delicate rose, striped carmine, and spotted on white ground.
Mr. Jansen. Large rosy carmine flowers, edged and streaked violet red, cream blotch.
Madame Auber. Pale rose lilac blotch, sometimes dappled light rose.
***Mrs. P. Palmer.** Rose, suffused carmine, cream blotch, edge cherry red; very large flowers.
Madame Poiret. Coppery rose, slight golden blotch.
Mackinley. Striped white and red on fleshy ground.

The varieties marked with an asterisk cannot be supplied before August for . . September . . planting.

"The Daffodils and Narcissus Bulbs I got from you earlier in the year have just finished flowering; they were lovely. The Freesias are only just beginning, but are covered in buds."
 —E. G. Ingham, Ivanhoe, Cranbury, 20/9/07

Our Stocks of
CHOICE HYBRID
GLADIOLI
are the
finest in
Australia.

"I cannot speak too highly of the satisfaction I got from the Bulbs I received from you last year. Every bulb flowered, and some of the blooms were very fine: indeed, they won the admiration of everybody. I took several prizes at our Horticultural Show last year with your bulbs, and hope to do the same this year."—L. T. Waldron, 11 Hight-st., Launceston, Tas.

OUR ILLUSTRATED SEED AND PLANT CATALOGUE WILL BE POSTED IN MARCH.

ANDERSON & CO., for Seeds, Plants, and Bulbs.

Choice Gladioli—continued

Gladioli Gandavensis 1s each; 10s doz.—(continued).

- Marguerite Cadeau.** Almost pure white, lilac rose eye.
Neron. Beautiful dark red, suffused violet.
Norma. Pure white, sometimes suffused with lilac.
Nestor. Light yellow, striped red.
***Nuee d'Orange.** Almost entirely slate colour.
Olympe. Spike large and well set with full flowers of intense rose, white blotch.
Osmanli. Dark orange-coloured flowers, streaked and spotted white.
Phœbus. Brilliant red, with large pure white and very conspicuous blotch.
Pactole. Beautiful yellow, slightly tinged with rose at the edges; blotch of a darker shade.
Pepita. Golden yellow, edges of the petal slightly striped carmine towards the end of flowering season.
***Perfection.** Pale flesh rose, streaked and banded coppery rose.
Rosalba. White ground, blotched with carmine, fine spike.
Rose des Haies. Pretty spike of flesh-coloured flowers, centre white and yellow.
Sceptre de Flore. White throat, brightening to richest rose, spotted carmine.
Sultana. Satin rose, flamed carmine, purple carmine blotch.
***Stromboli.** Large and beautiful flowers of the deepest scarlet, with pure white blotch.
Thermidor. Salmon red, flushed and edged slaty grey.
Therese de Vilmorin. Flowers a creamy white, passing into pure white, few purplish rose stripes in centre.
Tigridia. Salmon yellow, large and open, flamed rosy carmine.
Titania. Beautiful tall spike, creamy salmon, flamed cherry.
Tournefort. Fine spike, flowers carmine red, streaked violet.

Gladioli Gandavensis at 1s 6d each; 15s doz.

- *Admiral Pottier.** Large spike, good flowers, dazzling scarlet red colour.
***Chrysomele.** Yellow, striped red, golden blotch.
Gallieni. Immense flowers, intense cinnamon red.
Granite. Beautiful rose, striped and dotted deeper shade, large white blotch.
Gargantua. Large flowers, rosy carmine, striped violet red, very bright in centre.
Grand Conde. Bright salmon rose, striped violet red, fine spike.
Le Cid. Enormous flowers, intense scarlet red, striped and blotched white
Nelusko. Lovely spike of most striking violet red.

Gladioli Gandavensis at 2s 6d each; 27s doz.

- Andre Del Sarto.** Large, well-expanded flowers, fine cherry red, large creamy white blotch.
***Aphrodite.** Very large flowers, rose colour, with purplish red blotch on white ground.
***Blanchefleur.** A superb white.
Colonel Destenave. Pale lilac, striped and blotched dark violet red, fine spikes.
***Delicatesse.** Cherry red, marbled purplish red, stripes and blotch creamy white.
Dorothee. Large flowers, fine lilac, flamed carmine, narrow red blotch.
Fernando Cortez. Dense spike, grand flowers of a pale yellow, almost a self; fine.
***La Candeur.** Almost white, lower petals suffused straw colour.
***Marie Therese.** Almost white; a few rosy stripes on straw-coloured blotch.
***Martinique.** Fine dark red, pale yellow blotch.
Ribera. Large flowers, deep copper red, yellow blotch, striped purplish brown.
***Safrano.** Delicate nankeen yellow, centre currant red.

Gladioli Lemoinei 1s each; 10s per doz.

- *Armenien.** Pale lilac, violet blotch.
Achanti. Dark red-brown, very rich.
***Baron Joseph Hulot.** Large flowers, rich violet, almost blue.
Domino Rose. Pale cherry red, blotch straw colour.
Dr. James Clark. Dark granite red, creamy blotch.
***Eclairer.** Early bright red, with dark blotch.
Ethiopie. Deep violetish red, dark velvety blotch.
***Eldorado.** Pure yellow, blotch dark.
***General Faidherbe.** Carmine rose, dark purplish red blotch.
Mons. Leveque. Splendid velvety crimson, lined golden yellow.
Madrilene. Bright salmon rose, carmine blotch on white ground.
***Malvina.** White, suffused lilac red blotch on white ground.
Mephistopheles. Deep red, blotched black and sulphur; unique.
Princess Altieri. White, with crimson red blotch.
***Reve Bleu.** Bluish lilac colour, with dark violet blotch.
Tomboucton. Deep purplish blue.
Tricolore. Creamy rose, suffused lilac, blotch dark violet.
***Voie Lactee.** White, edged lilac, dark violet blotches edged blue.

Gladioli Lemoinei at 1s 6d each; 15s doz.

- *General Kouropatkine.** Dark velvety crimson-red.
Lacordaire. Fiery vermilion; early.

Gladioli Lemoinei—continued

- Madame Desboides Volmaire.** Large salmony white flowers, large scarlet blotches and edged straw.
Marc Marcheli. Pale lilac, heavy blotch purple colour, ending yellow line.
Micromegas. Large bluish violet flowers, inner petals blotched purple.
***Senateur Volland.** Large flowers, pure blue, dark blotch with a yellow stain; striped blue.

Gladioli Lemoinei at 2s 6d each; 27s per doz.

- Henry Leveque de Vilmorin.** Large well-opened flower, salmon rose, red blotch on creamy ground.

Gladioli Nanceianus 1s each; 10s doz.

- A. R. Smith.** Fiery carmine red, pencilled with purple and straw colour.
Abbe Roucourt. Crimson, pencilled blood red.
***Alsace Lorraine.** Carmine red, straw-coloured blotches.
***Apotheose.** Magenta red, pencilled purplish red, edged white.
Brahma. Fine carmine red, large white blotch on lower divisions.
***Charles de Bosschere.** Violet rose, red blotch on white ground.
Georges Frick. Crimson red, blotched brown, pencilled white.
***Gustave Grunerwald.** Vermilion red, fine.
Pacha. Orange red, striped red on sulphur ground.

Gladioli Nanceianus at 1s 6d each; 15s doz.

- *Belzebuth.** Orange red, lower petals blotched straw colour and pencilled red.
Eugene Rambert. Slaty-violet, marbled violet-red, blotch narrow.
***Capitaine Brault.** Salmon red, brown blotch on creamy white ground.
***Colonel Gillon.** Rose colour, lower petals blotched white and pencilled purplish red.
Ferdinand Kegejian. Orange red, flamed salmon rose, blotched and pencilled straw colour.
G. A. Kuyk. Carmine red, blotched and pencilled purple on white.

Gladioli Nanceianus at 2s 6d each; 27s doz

- Colosse.** Large well-expanded flowers, salmony rose, suffused lilac.
***Edouard Andre.** Violet red, blotches pencilled brown on white ground.
***Surprise.** Bluish lilac, petals yellow, throat pencilled purplish red.

*Gladiolus Princes

This variety, belonging to the Nanceianus Section, bears enormous flowers, often 6 inches across. The colour is dazzling scarlet, with small yellow blotch and white band on the three lower petals. Late flowering. 2s 6d each.

Gladioli Colvillei (True Miniature)

Charming Gladiolus for cut blooms or table decoration; the graceful spikes are very light and beautiful, with delicate foliage.
The Bride. Pure white; a lovely variety.
Rosy Gem. White, with deep rosy markings. } 3d each;
Rubra. A beautiful flower, purplish red. } 2s 6d doz

Our Choice Gladioli

Bulbs in Splendid Mixture

This assortment includes many superb varieties and shades of colour, and every bulb will produce a flower worth looking at, and every collection, whether large or small, will include a great variety. All these bulbs are from our celebrated collection.

5s per doz.; 35s per 100.

Gladioli in Collections

Our magnificent collection of Gladioli includes a superb variety of the various selections, which produce flowers of the most lovely colours and shades. Every dozen bulbs we send out will have a splendid variety of colour.

12 lovely named varieties from list on pages 2 and 3 .. 10/-
 25 lovely named varieties from list on pages 2 and 3 .. 20/-
 Customers should allow us to substitute for any varieties sold out.

 100 Bulbs, 50 named varieties. Our own selection .. 60/-

Groff's New Hybrids

- El Sol.** A beautiful new yellow. 3s 6d each.
La Luna. Pale yellow, passing to white, brown markings at throat. 3s 6d each.
White, Yellow, and Dark Hybrids, mixed. 10s per doz.

OUR ILLUSTRATED SEED AND PLANT CATALOGUE WILL BE POSTED IN MARCH.

HYACINTHS

And their Culture.

SINGLE HYACINTH.

IN THE OPEN GARDEN. Hyacinths prefer a good sandy loam, enriched with old stable manure; peaty soils also suit them if well drained, or peat mixed with loamy or sandy soil grow them splendidly; do not succeed in dry soil. They should be planted in rows or in clumps 6 to 12 inches apart, and the crown of the bulb must be covered with at least an inch of soil. If the shoot when it comes through the ground shows an inclination to open and reveal the flower buds which it encloses, cover it up at once with an inverted flower pot, the object being to draw the flower stem from the bulb while it is enclosed in the leaves, and before the flower is exposed to the sun. If this is not done, it sometimes happens that the flower begins to colour when only a portion of it has appeared, and the beauty of the spike is thus lost. Allow the flower pot to remain until the flower stem is well through and above ground; then remove it, and fine spikes will be secured. The bulbs must be lifted when they have done flowering and their foliage has died down.

HYACINTHS GROWN IN POTS are very beautiful. Plant in 6-inch pots, in rich, loamy, sandy, or peaty soil, well mixed; drain the pots well, place them in a shady or dark place until shoots appear above ground, and water sparingly, but when in full growth give a liberal allowance.

TO GROW HYACINTHS IN WATER. (Glasses for this purpose see below.) Place the Hyacinth in the glass sufficiently filled with water to allow the base of the bulb barely to touch it, and place them in a dark cupboard for about three weeks, until the roots are well started and the shoot is at least half an inch long; then remove them by degrees to a well-lighted position in the room near the window, and as close to the glass as possible. Renew the water once a week, and keep it filled up to the base of bulb only.

Hyacinths grown in water are most interesting, and make lovely plants, spikes often 9 inches long; they are very easily grown, and do well in this climate.

Roman Hyacinths

3d each; 2s 6d per doz.

EARLY WHITE.

Its pure white and deliciously-scented flowers render this variety most attractive. It makes a very pretty show when grown in pots; the spikes are small, but very pretty—4 or 5 in a 6-inch pot.

Bedding Hyacinths

4s 6d per doz.; 30s per 100.

They are most suitable either for massing in beds or borders.

Hyacinthus Candicans

6d each.

Distinct species of Hyacinth, producing a long spike, 4 feet high, covered with white bell-shaped flowers.

"The Bulbs I received last month in splendid condition; no room for improvement."

R. H. Brown, Scone, 6/4/07.

Single Hyacinths

9d each; 8s 6d per doz.

RED, and Shades of Red.

- Betsy.** Red; a grand spike.
- Cleopatra.** Large spike, bells salmon blush, good.
- Comet.** Pale red, strong grower, fine spike.
- Eldorado.** Deep crimson.
- Eliza.** Dark red, good form, large spike.
- Grand Blanche Imperial.** Rich deep blush; large.
- L'ami du Cœur.** Beautiful bright rosy red.
- *Madame Hodson.** Pink, good truss.
- Maria Cornelia.** Light rose, early.
- Monsieur de Faesch.** Pink, fine.
- Robert Steiger.** Bright crimson, large truss.

WHITE, and Shades of White.

- *Baroness von Thuyll.** Large handsome truss, fine.
- L'Innocence.** Pure white; good.
- Madame de Stael.** Pure white, fine truss.

BLUE, and Shades of Blue.

- *Baron von Thuyll.** Dark blue.
- *Charles Dickens.** Pale blue.
- Cœur Blanc.** Dark purplish blue, large white eye.
- Laurence Coster.** Deep purple.
- Mimosa.** Dark purple, very distinct, almost black.

YELLOW, and Shades of Yellow.

- Fleur d'or.** Fine, pale shade.

Double Hyacinths

9d each; 8s 6d per doz.

RED.

- Sir Walter Scott.** Light rose.

WHITE.

- Bouquet Royal.** Pure white.

BLUE.

- Konig von Wurtemberg.** Deep strong blue; good.
- La Belle Blanchiseuse.** Rich blue.
- Lord Nelson.** Deep blue, fine.

YELLOW, and Shades of Yellow.

- Sovereign.** Fine, good spike.

Owing to the exceptionally dry spring, Hyacinth bulbs this season are very scarce, and not up to the usual standard in size. They are, however, all good, sound, flowering bulbs.

To those who intend growing Hyacinths in water, we recommend single varieties only; the bulbs are larger, and the trusses of flower more compact than the double sorts. Our stock is limited, and customers should place their orders early to avoid disappointment.

The varieties most suitable for growing in water are marked with an asterisk (*).

For Collections of Bulbs see Inside Back Cover.

Hyacinth Glasses

Supplied for the purpose of growing and flowering Hyacinth Bulbs in water as a drawing-room ornament.

Various Colours, 8d each; 7s doz.

Brass Hyacinth Supports 4d each.

IRIS SUSIANA

Iris Kaempferi (Japanese Flag Iris)

1s each; 9s per doz.

For size and richness of colour the following varieties of the Japanese Iris are unequalled, with an indescribable mass of colouring, flowers often measuring 6 to 8 inches across. They grow to a height of 2 feet, and must have a moist situation; with light rich soil, swampy land will grow them well.

Large Maroon.	Brilliant Purple , yellow blotches.
Dark Blue.	Tyrian Blue , feathered white.
Large Blue and variegated.	Navy Blue , yellow blotches.
Light Maroon.	White , primrose blotches.
Light Blue.	Sky Blue , primrose blotches.
Double Violet.	Lavender and White , yellow blotches.

Iris Pavonia (Peacock Iris)

3d each; 2s 6d doz.

A beautiful variety, supporting on slender stems lilac-coloured flowers with an intense blue spot on each petal.

Muscaria (Grape Hyacinth)

3d each; 2s doz.

Pretty bluish violet and white flowering bulbous plants, dwarf and free flowering.

Nerine Very handsome flowers.

Sarniensis (GUERNSEY LILY). Belongs to the Amaryllis tribe; thrives well in the open ground; flowers a pale salmon colour. 1s each.

Japonica (THE BEAUTIFUL JAPANESE SPIDER PLANT). 6d each; 4s per doz.

A very handsome plant; the flower stalks are 9 to 12 inches high, crowned with umbels of bright red flowers with long curved stamens; charming.

IRIS

Nothing can exceed the beauty of this charming family of plants, remarkable alike for their curiously constructed and quaintly marked flowers, and for the peculiar manner in which the colours are blended; they are easily cultivated. Plant from March to May.

Iris Susiana
(The Mourning Iris)

1s 6d each.

A distinct and most beautiful variety; flowers large, with winged petals surrounding those enclosing the centre of the flower. Ground colour pale grey, lined and veined with dark brown, resembling tracery of the finest lace. It has been named the "Mourning Iris" because of its sombre colour, but to many that only adds to the charm of its beauty.

German Iris 6s per doz.

An exceedingly large handsome variety. They succeed best in moist situations, as it must have a free supply of water during the blooming season.

Spanish Iris (Orchid Iris)

We have grown these extensively during the past season, and can most strongly recommend them as decorative plants. The flowers are produced on slender stems about a foot high, bearing two or three flowers each. These are most fantastically shaped and of beautiful colours—yellow, bronze, and blue, with beautiful shades and markings. A single bulb will sometimes throw three or four spikes, and these when cut will last a long time in water, as the buds continue to open. As a dinner-table decoration they cannot be excelled. They will thrive in the open or partially shaded places, and should be planted in clumps. Any average soil will grow them, provided it is well drained.

A Collection of 12 Distinct Named Varieties, 3/6
Splendid Mixture, all shades .. 3s per doz.

SPANISH IRIS

LILIES

The beauty of form, the chaste delicacy of the white blooming varieties *Harrisi*, *Candidum*, and *Longiflorum*, and the magnificent colours of *Auratum* and *Lancifolium*, render these of the greatest importance as summer blooming plants. They will grow in any good garden soil, provided it is well broken up and drained, but they delight in light, fibrous, peaty soil when it is obtainable. By planting the proper varieties a display can be obtained all through the summer.

Liliums

- Harrisi** (TRUE EASTER LILY). A most lovely pure white Lily, with long graceful tube-shaped flowers produced in profusion on the crest of an upright stem. Without doubt the finest Trumpet Lily 1s each
- Longiflorum**. Pure white; dwarf; long tube 6d each
- Candidum** (SINGLE WHITE LILY). Very fragrant 9d each
- Lancifolium Album**. Pure white, recurved 9d each
- Lancifolium Roseum**. White, spotted rose, flowers recurved 9d each
- Lancifolium Rubrum**. White, spotted red, flowers recurved 9d each
- Pardalinum**. Scarlet, shading to yellow, spotted purple brown; very handsome 9d each
- Auratum** (GOLDEN RAYED LILY OF JAPAN). Flowers from 8 to 10 inches across; ivory white, thickly studded with crimson spots, and a bright golden band through centre of petal 1s 6d each
- Extra large bulbs, specially selected 2s 6d each
- Tigrinum** (TIGER LILY). Orange, spotted black 6d each
- Tigrinum Flore Pleno** (DOUBLE TIGER LILY) 9d each

"The Bulbs, etc., arrived in good order, as they were so carefully packed."—Miss Maley, Gollan, 6/4/06.

LILIUM AURATUM

Lachenalia

- Aurea**. Golden 6d each
- Quadricolour** 6d each
- Very free flowering; flowers yellow, margined with green, red, and orange; spotted leaves.

SEE OUR COLLECTIONS OF BULBS ON INSIDE OF BACK COVER.

Ixia

A charming family of hardy flowering plants; flowers are scarlet, lavender, white, or green, on light graceful stems, produced in great profusion. Any light soil will grow them; they should be planted in clumps, or in rows 4 inches apart.

Viridiflora. Green flowered Ixia. One of the few flowers of this colour; a charming variety. Stock limited. 2s per doz.

Scarlet. Most brilliant colour; charming flower.

Yellow. Beautiful shade of yellow, dark throat. 1s 6d doz. 8s 6d 100. 75s 1000.

White. Fine pure white.

Mixed. All colours.

Named varieties. A splendid assortment. 3s 6d per doz.

Jonquil

These are often confused with *Polyanthus Narcissus*; they are, however, quite distinct. The flowers are pure yellow in colour only, and much smaller in size. They are deliciously fragrant, very early, and last a long time.

Single. The true sweet-scented Jonquil. 1s 6d per doz.

Double. Yellow. 2s 6d per doz.

Campanelli. 2s per doz.

LILIUM CANDIDUM

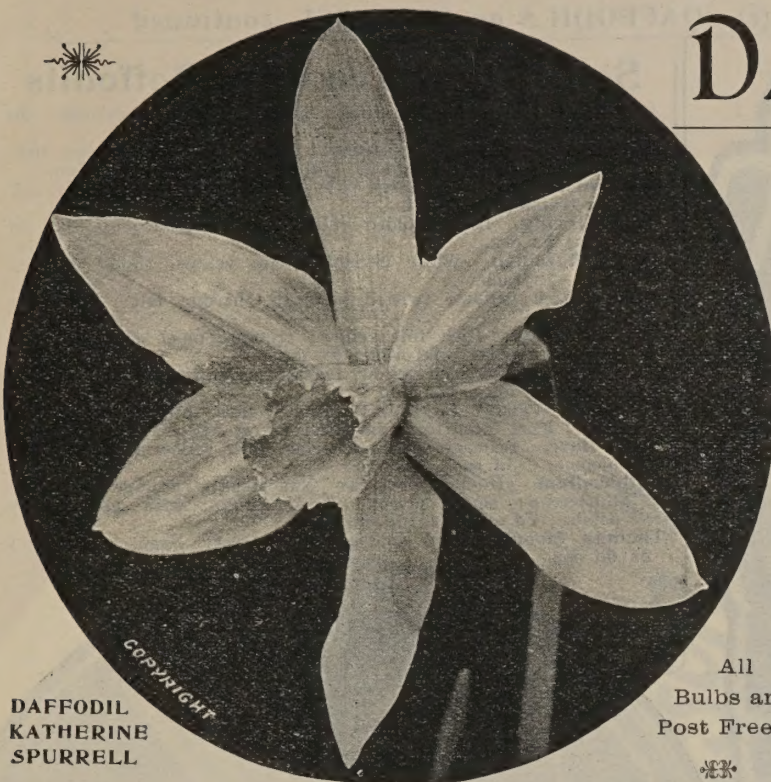

DAFFODILS

or NARCISSI

Although in Australia there is no such long winter rest for bulbous plants as in England and the Continent, nevertheless these charming plants, which mark the advent of spring in the old country, have their short rest here; but as soon as the approach of spring is heralded by the sunshine and warm days, the Daffodil wakes into new life and soon puts forth its bright flowers in all its loveliness to deck our gardens and our homes, and mark the springtime with their bright beauty, just as effectively in Australia as they do in England.

There is no more easily cultivated flowering bulb, for although the Daffodil prefers a strong loam, it will grow and flower freely in any average garden soil. The land should be well worked and deeply dug, but if it is very poor, well-rotted horse manure should be dug in to a depth of 8 to 12 inches so that it does not touch the bulbs. Bone manure can be incorporated with the soil to advantage. We offer strong bulbs which will flower the first season. These should be planted 6 inches apart, and the crown of the bulb should not be covered more than 2 inches. The flowers keep a long time when cut, and retain their brilliant colours in water for several days.

Daffodils can also be grown in water with much success, and their cultivation in this way is most interesting. Half fill a china or glass bowl with pebbles, or small pieces of sandstone, so as to keep the bulbs in position; then fill in with water to reach just above base of bulbs, and keep filled up to that level when water goes down by evaporation; about 6 bulbs in a bowl will make a good show. Sir Watkin, Emperor and Empress are very suitable for the purpose.

THE TRUE ENGLISH SNOWDROP

DAFFODILS or NARCISSI—continued

Barri

Conspicuous. Broad spreading perianth; broad short cup, conspicuously edged orange scarlet, the most beautiful of this type. 2d each; 1s doz.; 6s 100; 50s 1000.

Flora Wilson. Pure white perianth, cup stained orange scarlet, very striking flower. 4d each; 3s doz.

General Murray. Creamy white perianth; canary cup, edged orange. 2d each; 1s 6d doz.; 9s 100.

Miriam Barton. Soft delicate primrose; distinct. 2d each; 1s 6d doz.; 9s 100.

Burbidgei

Burbidgei. Clear white cup, margined bright cinabar red; a beautiful early-flowering form of Poeticus. 2d each; 1s doz.; 6s 100; 50s 1000.

Ellen Barr. Broad white perianth; cup citron, stained orange scarlet. 6d each; 5s doz.; 30s 100.

Falstaff. Perianth snowy white; cup lemon, margined orange. 2d each; 1s doz.; 6s 100.

John Bain. Large white perianth; citron cup. 2d each; 1s 6d doz.

Double Daffodils

Double Yellow (AURANTIUS PLENUS). Double yellow, with orange centre. 2d each; 1s 6d doz.

Orange Phoenix (ALBUS PLENUS AURANTIUS). White, with orange nectary, beautiful. 3d each; 2s 6d doz.

Sulphur Phoenix (ALBUS PLENUS SULPHUREUS). White, with sulphur nectary, exquisite. 6d each; 5s doz.

Telamonious Plenus. Great double yellow daffodil. 3d each; 2s doz.

Poeticus

Alba Plena Odorata. Double white; Gardenia flowered; useful for cutting. 3d each; 2s 6d per doz.

Grandiflorus. Perianth pure white; cup diffused crimson. 9d each; 8s doz.

Ornatus (PHEASANT'S EYE). Single; pure white imbricated perianth; flat cup; edged scarlet. 2d each; 1s doz. 6s 100; 50s 1000.

Poetorum. Perianth pure white; cup orange scarlet. 6d each; 5s doz.

Polyanthus or Bunch-Flowered Narcissus

Bathurst. Pale lemon; good; large flower, very early. 2d each; 1s 6d doz.

Double Roman. White, orange nectary, early. 2d each; 1s 6d doz.

Duchess of Albany. Creamy white, orange cup. 2d each; 1s 6d doz.

Dubius Grandiflorus. Cambrie white; very large. 2d each; 1s 6d doz.

Grand Monarque. White perianth, yellow cup; immense truss; the finest of all; late. 3d each; 2s doz.

Grand Primo. White perianth, yellow cup. 2d each; 1s 6d doz.

Grand Soliel d'Or. Deep rich yellow, with orange cup. 2d each; 1s 6d doz.

Paper White. Charming pure white; exquisite perfume; early. 2d each; 1s doz.

White Pearl. Pure white; very fine flower; late. 2d each; 1s 6d doz.

GALANTHUS NIVALIS

(The True English Snowdrop)

This is the true Snowdrop known so well in England, but seldom offered for sale here. They flower straight from the bulb on single stems, and are much more dwarf than the well-known "Snowflake," generally called Snowdrop in Australia. They require a cool, partly shaded situation, and give a pretty effect dibbled into grass lawns or banks. Our stock is limited, and orders should be sent early to secure them. Many of our customers were very successful with these last season. 3s per doz.

OUR ILLUSTRATED SEED AND PLANT CATALOGUE WILL BE POSTED IN MARCH.

RANUNCULUS ASIATICUS SUPERBISSIMUS.

Ranunculus

A Lovely Bulbous Flower

We very strongly recommend the beautiful Ranunculus as one of the most charming of our spring-flowering plants; the flowers are very double, and sometimes four inches across; a bed of them in full bloom is a glowing mass of colour. They prefer rich loamy soil, but will grow in any average land if well enriched. Plant at least six inches apart, and the ground made firm. PLANT CLAWS DOWNWARDS.

Turban Scarlet		1s per doz.; 5s per 100
Turban Yellow		1s per doz.; 5s per 100
Turban Grandiflora.	Fine crimson and yellow.	1s per doz.; 5s per 100
Turban White		1s 6d per doz.; 7s per 100
Turban Black		1s per doz.; 5s per 100
Turban d'Or.	Scarlet and gold,	1s per doz.; 5s per 100
Carmine.	A beautiful shade	1s per doz.; 5s per 100
Turban Mixed		1s per doz.; 5s per 100
Prince de Galitzin.	Superb spotted; very distinct,	1s per doz.; 5s per 100
Double French.	Splendid colours,	1s per doz.; 4s per 100
Persian Mixed.	Very fine,	1s 6d per doz.; 7s 6d per 100
Persian Finest Named Varieties.	In distinct colours	2s per doz.

Ranunculus Asiaticus

Colonial-Grown Bulbs

This beautiful variety is more varied in colour than the popular Shirley Poppy, which it somewhat resembles. There are both double and single varieties; for hardy spring flowers few things equal them. 1s 6d per doz.; 7s 6d per 100.

Snowflake

(Leucojum Aestivum)

Snowflake. A beautiful hardy bulb of the Snowdrop type, which it strongly resembles; the petals are prettily tipped with green; it does well in almost any soil or situation; height when in flower about 12 inches. 6d doz.; 3s 6d 100.

Tuberose

One of the most beautiful summer-flowering bulbs in cultivation; the blooms are of the purest white and of the most exquisite fragrance; they are admirably adapted for bouquet-making, and are easy to cultivate.

Double Dwarf,	} Small clumps, 6d each; post free, 9d.
"The Pearl"	
Double Single	} Large clumps, 1s each; post free, 1s 6d.

TUBEROSE

Ornithogalum Arabicum

(Star of Bethlehem.) A strong-growing showy plant, with large bunches of flowers produced on tall stems; colour white, with dark centre; very hardy. 3d each; 2s doz.

Scilla

Wood Hyacinth. A beautiful little spring-blooming bulb; flowers principally blue shades, produced on short stem; dwarf and exquisitely beautiful. 3d each; 2s doz.

**ALL OUR BULBS
ARE POST FREE.**

**VALLOTA
PURPUREA
(Scarborough Lily)**

SPARAXIS

Mixed. Embracing every shade and beautifully marked; for their refined colour and graceful habit Sparaxis never fail to win admiration; they are of easy culture; dwarf, 6 inches. 2d each; 1s 6d doz.; 7s 6d 100.

Pulcherrima (DIERAMA). Very beautiful species, known as "Fairy Bells"; produces stems 3 to 4 feet long, with pendulous bell-shaped flowers, quite distinct from the ordinary Sparaxis. 6d each.

Tulips

This genus of old favourite flowers can be grown in parts of our State with great success, and flowered the first season after planting. They prefer a rich sandy loam, but any ordinary land can be enriched by the addition of plenty of old stable manure to grow them successfully; if the soil is inclined to be stiff, the addition of sand would be serviceable. The cooler districts of our State will grow them admirably, but they will do fairly well in other parts if a cool or shady position is selected and plenty of water given, should the weather be dry during the growing season.

FINEST MIXED TULIPS.

Single. Very fine mixed. 2s 6d doz.

Double. Very fine mixed. 3s doz.

Double and Single Mixed. A grand variety. 2s 6d doz.

Tigridia

Pavonia (THE TIGER FLOWER), so called from the peculiar markings of its beautiful single crimson flowers, which are spotted with yellow; very hardy; height 10 to 12 inches. 4s doz.

Canariensis. Yellow, scarlet spots. 6d each.

Conchiflora. Yellow and red spotted. 6d each.

Grandiflora Alba (WHITE TIGER FLOWER). White, spotted crimson; large. 9d each.

Tritonia

Longiflora. A very useful decorative flower, allied to the Ixias; straw colour; distinct. 2d each; 1s 6d doz.

Salmon Red. A fine showy variety. 2d each; 1s 6d doz.

Mixed. From named sorts. Exceedingly free flowering and bright; quite hardy and easily cultivated. 2d each; 1s 6d doz.

Vallota Purpurea

(The Scarborough Lily)

One of the most gorgeous and brilliant bulbous flowering plants in cultivation. A lovely free flowering bulb of the Amaryllis family, suitable either for pots or borders; the flower is trumpet-shaped, produced in clusters, and of a rich orange scarlet; spike, 18 inches. 1s 6d each.

Watsonia

O'Brieni Alba. Lovely pure white. 4d each; 3s doz.

Rosea. A beautiful shade of rosy red. 4d each; 3s per doz.

Dry bulbs can be supplied up to the end of June, and during July and August in pots.

O'Brieni Alba is a magnificent plant; when in flower it is from 4 to 5 feet in height, and throws up enormous spikes, and produces side shoots which flower in succession for a month or six weeks. Very suitable for cutting.

ANDERSON & CO., 399 George Street, Sydney.

MISCELLANEOUS BULBS

Anomatheca Cruenta

(Red Freesia)

A very pretty Cape Bulb, in growth very much like the Freesia, but the colour is a rich carmine crimson. They do well in open borders, also make pretty pot plants. 3d each; 2s 6d doz.

Agapanthus Blue .. 9d each.
White .. 9d each.

Crown of beautiful flowers on stem 3 feet long.

Begonia Tubers

A fine mixture, or in separate colours. Single varieties, 1s each; 10s doz. Double varieties, 1s 6d each; 15s doz.

Can be supplied during May, June, July, August, and September.

Calla

Æthiopica (ARUM LILY). The Old Nile Lily. 1s each.

Maculata Alba. Spotted leaves, white flowers; pretty pot plant. 1s each.

Chlidanthus Fragrans

A very pretty bulbous plant. The flowers are a pure yellow, and are very highly scented; well worth a place in every garden. 6d each; 5s doz.

Crinum

1s 3d each.

A beautiful plant; its habit resembles the Agapanthus. The flowers are produced in bunches on tall stems.

Capense. White, with pink stripe. **Moorei.** Beautiful pink.

Cyclamen

Strong bulbs, in splendid mixture. Can be supplied during March, April, and May. 1s 6d each; 15s doz.

Gloxinia Tubers

A grand assortment of colours. Can be supplied during May, June, July, and August. 1s each; 10s per doz.

Hæmanthus Speciosa

A very curious bulbous plant from South Africa. The flowers have a peculiar brush-like appearance. 6d each.

Montbretias

Extremely hardy free-growing plants, which flower profusely when thoroughly established. The flower stems are from 2½ to 3 feet in height, and gracefully arched, and the colours are charming—bright orange, golden yellow, orange and bright vermilion, and rose.

Named Varieties, 3 kinds. 3d each; 3s doz.
In Fine Mixture. 3d each; 2s 6d doz.

Pancratium

Beautiful pure white flowers, exceedingly fragrant; water freely during the growing season. 1s each.

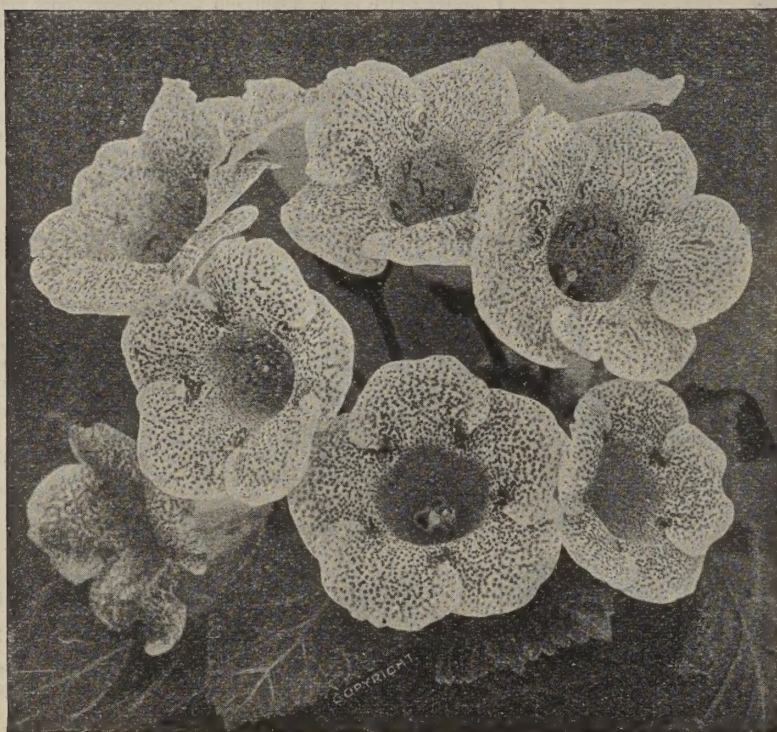

Polygonatum

(Solomon's Seal)

A graceful plant, having arching stems of pendant white flowers, partly hidden beneath its foliage. 6d each.

Zephyranthes Rosea

A pretty little bulbous plant, belonging to the family of Amaryllis. 3d each; 2s 6d doz.

GLOXINIA (ANDERSON'S SELECTED TYPES)

Gloxinia Bulbs may be had in May, June, July and August.

SEEDS for the FARM

FOR AUTUMN SOWING

Swede Turnip. Anderson's Imperial Purple Top; the best of all varieties.
Sowing Rape. Prime, clean, broad-leaved Essex Sowing Rape; a splendid sheep feed.
Barley. Cape and Skinless, both excellent green fodder plants.
Lucerne. Broad-leaved, N. S. Wales grown; the king of all fodder plants; grown all over the State.
Burnett. A magnificent feed for sheep and cattle; suitable to the dry districts, where Lucerne will not succeed.
Tares. Black and Golden. Sown with Barley or Oats, gives a splendid green crop for cattle and horses.
Oats. White Tartarin, Algerian, and others. Well known excellent fodder plants.
Rye. Common and Thousandfold. Excellent green feed; grand thing to sow with Tares.
OTHER FIELD CROPS.—Horse Beans, Field Peas, Buckwheat (sow not later than March), Carrot, Field Cabbage, Thousand-Headed Kale.

GRASSES—Prime Machine Cleaned Samples

Pearl Rye Grass. North of Ireland; extra heavy seed.
Prairie Grass. New Zealand grown; well cleaned.
Cocksfoot Grass, Paspalum, Clovers, English Grasses, Rib, Timothy, Phalaris.

SAMPLES AND PRICES ON APPLICATION.
